Software Development graduate with experience building web and mobile applications using JavaScript, React, and modern cloud technologies. Seeking entry-level developer position.

Education

Software Development Bachelor of Applied Science *June 2025*
Bellevue College, Washington, GPA: 3.7

Experience

Software Engineer, Ace Rocket, Washington *January 2025 – Current*
Personalized online learning platform to help students prepare for the SAT and AP math exams.

- Built a user performance tracking system using JavaScript and Firebase, enabling personalized learning paths for SAT/AP math students
- Developed and refined daily practice plan logic to recommend questions based on student weaknesses and prior history
- Collaborated with the founder in an early-stage startup environment to prototype, test, and ship new features to 150+ users

Full-Stack Software Developer, TiriVelo Pet Services, Cananda *January 2025 – Current*
Capstone project - Developing a commercial cross-platform mobile application for pet booking service.

- Building a mobile app for both android and IOS using React Native, Expo, PostgreSQL
- Leveraged Supabase as our backend system to handle CRUD operations within the application
- Collaborated with four team members to design and implemented features such as, user authentication, booking, scheduling, and user profile management

Academic Projects

Hospital Management System *June 2024*
A healthcare application that simplifies patient records, data analysis, and inventory for hospitals

- Built using C#, .NET and applied CRUD operations to enable staff to manage patient records
- Integrated MongoDB and SQL Server to store and retrieve patient and hospital data

Bike Parking *June 2024*
A crowd-sourced mobile application that helps users find and post bike parking spots around the city

- Created with React.js, and hosted on Google's Geolocation API to convert user addresses into precise coordinates for reliable location-based services
- Implemented neDB to store parking data and enabling offline access for users

Skills

Languages: JavaScript, C#, HTML, CSS

Frontend: React.js, React Native, Expo

Backend: Node.js, Express.js, .NET

Databases: SQL Server, MongoDB, Firebase, Supabase, PostgreSQL

Tools: Git, GitHub, Google Cloud, Azure, Jira, Postman, Linux CLI
